

COURSE CALENDAR
PHYS 5306: "Classical Dynamics"
Fall 2020

Topics:

- I. Lagrangian and Hamiltonian mechanics (sections 1-10, 40): 8/25-9/15
- II. 1-d and central force problems (sections 11, 13-15): 9/17-10/1
- III. Collisions and scattering (sections 16-20): 10/8-10/22
- IV. Small oscillations (sections 21-23): 10/27-11/3
- V. Rigid body motion and non-inertial reference frames (sections 31-36, 38-39): 11/5-12/1

Important dates:

- 8/25: Classes begin
- 9/7: Labor Day holiday
- 11/25-11/27: Thanksgiving vacation
- 12/2: Last day of classes

Exams:

- Midterm 1: Tuesday 10/6 (in class)
- Midterm 2: Thursday 11/19 (in class)
- Final (oral): Saturday 12/5, 1:30 PM - 4:00 PM

Texts:

- "Mechanics" by Landau and Lifshitz
- "Classical mechanics" by Benacquistia and Romano
- "Classical mechanics" by Goldstein, Poole, Safko
- "Classical dynamics" by Marion and Thornton
- "The variational principles of mechanics" by Lanczos
- "Collection of problems in classical mechanics" by Kotkin and Serbo
